

## Residential Vertical Gate Openers

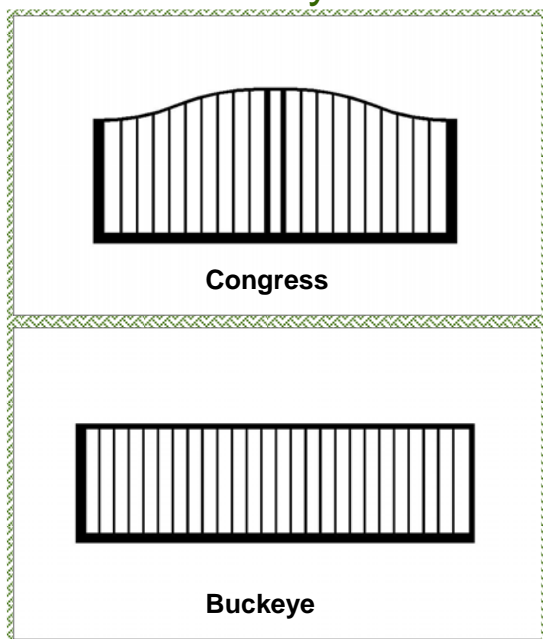

**Economical** -The Lazy Gate provides an economical approach to vertical gate opening for the farm or home setting. The unique Lazy Gate mounting base allows an Apollo swing gate operator to open a gate vertically.

**Space Saving** - Opening a gate vertically requires less space than swinging a gate open which reduces problems associated with limited space, uneven terrain and snow.

**Capacity** - Lazy Gates should be 4'6" tall, 12 to 18 feet long, and weight less than 250 lbs.

Apollo Gate Operators Qualify for the Residential Energy Property Tax Credit Offered by the US Government
